INDEPENDENT AUDITORS' REPORT

Shareholders and Board of Directors
Avanza Casa de Valores, S.A.
Panama, Republic of Panama

Opinion

We have audited the financial statements of Avanza Casa de Valores, S.A., hereinafter "the Company," which comprise the statement of financial position as of December 31, 2024, the statement of income, other comprehensive income, changes in equity, and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as of December 31, 2023, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code of Ethics) together with the ethical requirements that are relevant to our audit of the financial statements in the Republic of Panama, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements of the Company

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRS), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements, as a whole, are free from material misstatement, whether due to fraud or error, and to issue an audit report that contains our opinion. Reasonable assurance is a high level of assurance, but it does not guarantee that an audit conducted in accordance with the ISAs will always detect a material misstatement when it exists. Misstatements may arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with the ISAs, we exercise professional judgment and maintain a stance of professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of the internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide to those charged with governance with a statement that we have met the ethical requirements relevant to independence and we communicate all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Other Legal Information

In compliance with Law 280 of December 30, 2021, which regulates the profession of the certified public accountant in the Republic of Panama, we declare the following:

- The direction, execution, and supervision of this audit work have been physically carried out in Panamanian territory.
- The partner in charge of the audit that has prepared this report of the independent auditors is Eduardo Javier Quintero Parra with C.P.A number 9587.
- The audit team that participated in the group audit referred to in this report is composed of: Eduardo Javier Quintero Parra, Audit Partner; Daniel Mckenzie, Quality Partner; and Eduardo Javier Quintero Rosario, Audit Manager.

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(1) General Information

Avanza Casa de Valores, S.A.

(hereinafter "the Company") is a corporation established on May 29, 2006, under the laws of the Republic of Panama, through Public Deed No. 3820, registered in the file No. 529897, document Redi No. 970351 of the Commercial Section of the Public Registry of the Republic of Panama.

Panam Capital Market Holding, S.A. owns 100% of the issued and outstanding shares of Avanza Casa de Valores, S.A.

Originally, the company was named Madison Securities, S.A. It later changed its corporate name in the Public Registry, as per Minutes of the Shareholders' Meeting of February 6, 2009, and Public Deed No. 2234 of April 1, 2009, and became Panacorp Casa de Valores, S.A. The name was subsequently changed to Avanza Casa de Valores, S.A., as reflected in Public Deed No. 2572 dated February 15, 2024, registered in the file No. 529897 of the Commercial Section of the Public Registry of the Republic of Panama.

The Company's primary office is located at P.H. Oceanía Business Plaza, Tower 1000, 22nd floor, office A-01, Punta Pacífica, San Francisco district, Panama City, Republic of Panama.

Regulatory and Supervisory Framework of the Company

The Company is a member of the Panamanian Association of Capital Markets (APAMEC) and obtained its license as a Casa de Valores through Resolution CNV No. 75-08 on January 9, 2008, from the Superintendency of the Securities Market of the Republic of Panama (hereinafter "the SMV"). This resolution grants the Company the authority to operate as a Casa de Valores and conduct all activities allowed under Decree Law No. 1 of July 8, 1999, and its regulations, published in the Official Gazette on February 23, 2012. The Company began operations in September 2008 and is regulated and supervised by the SMV.

The Company's key personnel are:

Names	Position
Erwin K. Thomas M.	Senior Executive
Andrea Tribuiani	Compliance Officer
Alcides J. Carrión R.	President/Legal Representative
Eisenmann Abogados y Consultores	Resident Agent

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(1) General Information (Continued)

The members of the Board of Directors and Directors are the following:

Names	Position
Alcides J. Carrión R.	President
Erwin K. Thomas M.	Director
Melva Ellis	Treasurer and Secretary
Luz Mery Arango Ortega	Director
Ángel Eduardo Pinzón Peralta	Director

(2) Basis of Preparation

a) *Statement of Compliance*

The financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

These financial statements were authorized for issuance on March 28, 2025, by Management.

b) *Measurement Basis*

The financial statements are prepared on the basis of historical cost, except for items measured at fair value with changes in profit or loss and with changes in other comprehensive income.

c) *Functional and Presentation Currency*

"The financial statements are presented in balboas (B/.), the currency of the Republic of Panama, which is at par and freely convertible with the United States dollar (US\$). The Republic of Panama does not issue its own currency, and therefore, the United States dollar (US\$) is used by the Company as both the legal tender and the functional currency.

d) *Responsibility for the Information*

The information presented in the financial statements is the responsibility of the Company's management.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies

e) Comparative Information

As required by IAS 1 "Presentation of Financial Statements," the information presented in the financial statements for the year 2023 is presented for comparative purposes with similar information for the year 2024.

The accounting policies detailed below have been consistently applied by the Company and are similar to those applied in previous years.

a) Cash and Cash Equivalents

For the purposes of the cash flow statement, cash equivalents include time deposits at banks with original maturities of three months or less.

b) Financial Instruments

b.1) Recognition and Measurement of Financial Instruments

Financial assets and liabilities are recognized on the date they originate.

At initial recognition, they are recorded in the statement of financial position at their fair value, plus or minus transaction costs directly attributable to the transaction for those assets or liabilities measured subsequently at amortized cost; otherwise, such transaction costs are recognized in the statement of profit or loss for the year.

b.2) Classification of Financial Instruments

The Company classifies financial assets based on how they are subsequently measured, either at amortized cost (AC), fair value through other comprehensive income (FVOCI), or fair value through profit or loss (FVPL), based on the entity's business model for managing financial assets and the contractual cash flow characteristics of the financial asset.

Financial Assets at Amortized Cost (AC)

A financial asset is measured at AC if it meets the following conditions:

- The asset is held within a business model whose objective is to hold the assets to collect the contractual cash flows; and
- The contractual terms of the financial asset give rise to cash flows on specific dates that are solely payments of principal and interest on the principal amount outstanding.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

Interest income from these financial assets is included in "interest income" using the effective interest rate method.

Assets at Fair Value with Changes in Other Comprehensive Income (FVOCI)

A debt instrument is measured at FVOCI if it meets the following conditions:

- The asset is held within a business model whose objective is achieved both by collecting contractual cash flows and by selling financial assets; and;
- The contractual terms of the financial asset give rise, on specific dates, to cash flows that are solely payments of principal and interest on the outstanding principal amount.

Upon initial recognition of an equity investment that is not held for trading, the Company may irrevocably choose to present subsequent changes in fair value in other comprehensive income. This choice is made on an investment-by-investment basis.

Additionally, upon initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the criteria to be measured at amortized cost or at fair value through other comprehensive income as fair value through profit or loss if doing so eliminates or significantly reduces an accounting asymmetry that would otherwise arise.

Assessment of Whether Contractual Cash Flows Are Solely Payments of Principal and Interest

For the purpose of this assessment, "principal" is defined as the fair value of the financial asset at initial recognition. "Interest" is defined as the consideration of the time value of money and the credit risk associated with the outstanding principal amount over a specific period, as well as other risks of a basic loan agreement and associated costs, along with the profit margin.

When assessing whether the contractual cash flows of the instrument are solely payments of principal and interest, the Company evaluates whether the financial instrument contains a contractual term that could change the timing or amount of the contractual cash flows in such a way that it would not meet this condition.

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

When performing the evaluation, the Company considers the following:

- Contingent events that change the amount and timing of cash flows.
- Leverage characteristics.
- Legal terms that limit the Company's ability to claim cash flows.
- Changes in the environment that could affect the time value of money.

Financial Liabilities

Financial liabilities are classified at amortized cost using the effective interest rate method, except for those financial liabilities that are measured at fair value through profit or loss.

c) *Derecognition of Financial Assets and Liabilities*

Financial Assets

The Company derecognizes a financial asset, or a portion thereof, only when the contractual rights to receive the cash flows have expired, or when the Company has transferred the financial assets and substantially all the risks and rewards of ownership to another entity.

Financial Liabilities

The Company derecognizes a financial liability, or a portion thereof, when—and only when—the obligation specified in the corresponding contract has been discharged, canceled, or has expired.

d) *Write-Offs*

Loans and investments in securities are written off (either partially or in full) when there is no realistic expectation of recovery. This is generally the case when the Company determines that the debtor has no assets or income sources that could generate sufficient cash flows to repay the amounts owed and subject to write-off. However, financial assets that have been derecognized may still be subject to the Company's recovery procedures for amounts due.

e) *Measurement at Amortized Cost*

The amortized cost of a financial asset or liability is the amount at which the financial asset or liability was initially recognized, minus principal repayments, plus or minus the cumulative amortization—using the effective interest rate method—of any difference between the initial amount and the maturity amount.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

f) Fair Value Management

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal market on the measurement date, or in the absence of a principal market, in the most advantageous market to which the Company has access at that time. The fair value of a liability reflects the effect of non-performance risk.

The Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is considered active if transactions for the asset or liability occur with sufficient frequency and volume to provide ongoing pricing information.

When there is no quoted price in an active market, the Company uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The selected valuation technique incorporates all factors that market participants would consider when pricing a transaction.

The best evidence of fair value is a quoted market price in an active market. In cases where the market for a financial instrument is not considered active, a valuation technique is used. The assessment of whether a market is active may include, but is not limited to, consideration of factors such as the magnitude and frequency of trading activity, the availability of pricing information, and the size of bid and ask spreads. In inactive markets, ensuring that the transaction price provides evidence of fair value, or determining the necessary adjustments to transaction prices in order to measure the instrument's fair value, requires additional effort during the valuation process.

g) Impairment of Financial Assets

The Company assesses whether the credit risk on a financial instrument has increased significantly by considering reasonable and supportable information to determine if the risk of default as of the reporting date has deteriorated compared to the risk at initial recognition. Similarly, the Company must apply a definition of default that is consistent with the definition used for internal purposes and must consider qualitative factors (for example, financial covenants), where applicable.

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

As an exception to the general model, if the credit risk of a financial instrument is low at the reporting date, the Company may measure impairment using 12-month expected credit losses (12mECL); therefore, does not need to assess whether there has been a significant increase in credit risk.

For this operational simplification to apply, the financial instrument must meet the following requirements:

- The credit rating of the financial instrument is equivalent to the globally understood definition of investment grade.
- The debtor is considered, in the short term, to have a strong capacity to meet its obligations.
- The Company expects that, in the long term, changes in the debtor's economic and business environment will not necessarily reduce its ability to meet its obligations.

When credit risk is no longer considered low, the Company must assess whether there has been a significant increase in credit risk to determine if lifetime expected credit losses (LECL) must be recognized.

Based on the assessment of a significant increase in risk, IFRS 9 prescribes a three-stage model for recognizing credit impairment based on changes in credit quality since initial recognition:

- Stage 1: Includes financial instruments that have not experienced a significant increase in credit risk since initial recognition or that have low credit risk at the assessment date. For these assets, 12-month expected credit losses (12mECL) are recognized, where interest revenue is calculated based on the gross carrying amount of the asset.

The 12mECL are the expected credit losses that result from possible default events within 12 months after the reporting date. It does not represent expected cash shortfalls over the 12-month period but rather the probability-weighted loss resulting from possible defaults occurring in the next 12 months.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

- Stage 2: Includes financial instruments that have experienced a significant increase in credit risk since initial recognition (unless they have low credit risk at the assessment date) but that are not in default (Exposure at Default, EAD). For these assets, lifetime expected credit losses (LECL) are recognized, but interest revenue is still calculated based on the gross carrying amount of the asset.

The LECL are the expected credit losses resulting from all possible default events over the expected life of the financial instrument. Expected credit losses are the average credit losses weighted by the probability of default (PD) as the weighting factor.

- Stage 3: Instruments that are in default (EAD) during the reporting period. This stage includes financial assets that are in default at the measurement date. For these assets, lifetime expected credit losses (LECL) are recognized, and interest revenue is calculated based on the net carrying amount (i.e., net of the credit loss allowance).

For each of the stages mentioned, an expected credit loss (ECL) will be calculated, which includes both current and future conditions related to loan performance and different associated macroeconomic conditions.

For Stage 1, the expected credit loss will be recognized over a 12-month time horizon, while for Stages 2 and 3, it will be recognized over the lifetime of the instrument.

Significant Increase in Credit Risk

When determining whether the credit risk of a financial asset has significantly increased since initial recognition, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort, including both quantitative and qualitative information and analysis, based on the Company's historical experience and expert credit assessment, as well as forward-looking information.

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

The Company expects to identify whether a significant increase in credit risk has occurred for exposure by comparing:

- The lifetime probability of default (PD) as of the reporting date; and
- The lifetime probability of default (PD) at the same point in time, as estimated at the date of initial recognition of the exposure.

Measurement of Expected Credit Loss (ECL)

For the measurement of expected credit losses, the use of a probability of credit losses over the lifetime of the instrument is indicated. The quantification of expected losses takes into account the following factors:

- Probability of Default (PD)
- Loss Given Default (LGD)
- Exposure at Default (EAD)

Probability of Default (PD): for the assignment of the PD parameter, the methodology considers the credit rating of the instrument and the stage in which it is classified, as follows:

- Stage 1: It is the estimated probability of a default occurring over the next 12 months from the analysis date. In accordance with the standard, the Company defines its use for the performing portfolio that does not show a significant increase in risk or any evidence of impairment.
- Stage 2: It is the estimated probability of a default occurring over the remaining lifetime of an instrument, depending on the specific product conditions being analyzed. According to the standard, the Company defines its use for the portfolio with a significant increase in credit risk.
- Stage 3: It is the estimated probability of default based on objective evidence of deterioration, and the lifetime probability of default (PD) will be used.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

Loss Given Default (LGD): The severity or loss given default (LGD) estimates the loss that the Company could statistically incur after completing the recovery process in cases where default situations have occurred. LGD acts as a weight on the value of the credit exposure in the event of default. That is, an operation will have a potential loss (excluding expenses) equal to the exposure of the outstanding debt on the date of default (EAD), and the LGD will determine the portion of that total value that will ultimately be lost.

Exposure at Default (EAD): EAD refers to the outstanding balance of the financial instruments at the date of default, measured as of the expected credit loss (ECL) assessment date.

Forward-Looking Information

The credit rating of the instruments to be valued is one of the key pillars in determining expected credit losses (ECL), since it allows the Company to assess whether the asset has experienced a significant increase in credit risk since its initial recognition. Additionally, the credit rating is used to assign the different levels of probability of default (PD) and loss given default (LGD), as well as the stage to which the asset is assigned.

Definition of Impairment

The company considers a financial asset to be impaired when:

- The debtor is more than 90 days past due on any material credit obligation. Overdrafts are considered delinquent once the customer exceeds the established limit or is assigned a lower limit than the outstanding balance.
- There is a downgrade in the internal credit risk classification established by the Company, due to evidence of financial or operational deterioration.
- For fixed-income financial instruments, the following indicators, among others, may be considered as evidence of significant credit deterioration or default:
 - Downgrade in the issuer's external credit rating.
 - Failure to make contractual payments when due, or within the stipulated grace period;
 - High probability of payment suspension;
 - Probable entry into bankruptcy or the filing of bankruptcy or similar proceedings;
 - The financial asset is no longer traded in an active market due to financial difficulties.

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

h) Other Accounts Receivable

Other accounts receivable represents enforceable rights arising from brokerage services and are recorded at their realizable value. Recovery is expected within a period of less than one year.

i) Impairment of Non-Financial Assets

The carrying amounts of non-financial assets are reviewed at the reporting date to determine if there is any indication of impairment. If such an indication exists, the asset's recoverable amount is estimated, and an impairment loss is recognized equal to the difference between the asset's carrying amount and its estimated recoverable amount.

The impairment loss of an asset is recognized as an expense in the statement of income.

j) Furniture, Equipment, software and Leasehold Improvements

Property, plant, and equipment are tangible assets held by the Company for use in the supply of goods and services or for administrative purposes and are expected to be used over more than one period. These assets are recorded at acquisition cost and are depreciated using the straight-line method with appropriate rates to allocate the cost over the years of their estimated useful lives.

Licenses and software acquired from third parties are initially recognized at cost and amortized over a defined useful life. Amortization is calculated using the straight-line method to allocate the cost of the licenses over their estimated useful lives. Software is amortized over 60 months, and licenses are amortized over periods of 12 to 60 months.

Gains or losses on the disposal of fixed assets are determined by comparing the proceeds from the sale against the carrying amount of the asset, and the net portion is recognized in the statement of income. A fixed asset component is derecognized when the Company no longer expects future economic benefits from its use. Regarding impairment recognition, the asset's carrying amount must be adjusted if it exceeds the estimated recoverable amount.

The estimated useful lives of furniture and equipment are as follows:

Furniture and Equipment	5 years
Software	5 years
Leasehold improvements	5 years

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

k) Leases

At the inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Company evaluates whether:

- The contract involves the use of an identified asset – this can be specified explicitly or implicitly and must be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not considered identified.
- The Company has the right to obtain substantially all of the economic benefits from the use of the asset throughout the period of use.
- The Company has the right to direct the use of the asset. The Company has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used.

In exceptional cases where the decision about how and for what purpose the asset is used is predetermined, the Company has the right to direct the use if:

- The Company has the right to operate the asset; or
- The asset has been designed in a way that predetermines how and for what purpose it will be used.

At the commencement or reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component based on their relative standalone prices. However, for leases of land and buildings in which the Company is the lessee, it has elected not to separate non-lease components from lease components, instead accounts for them as a single lease component.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

The Company recognizes a right-of-use asset and a lease liability at the commencement date of the lease.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The estimated useful life of right-of-use assets is determined on the same basis as that of furniture, equipment, and improvements. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

l) Revenue Recognition

Commissions earned from transactions involving the purchase and sale of investments, asset management, custody, and other services, as well as commission expenses, are recognized when the related service is rendered or received. These commissions are recognized in the income statement net of reimbursement expenses and commissions paid to agents.

Commission income from contracts with customers is measured based on the consideration specified in the contract with the customer. The Company recognizes commission income when the related service is provided to the customer.

Interest income and expenses are recognized in the income statement using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts over the expected life of the financial instrument.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

m) Recognition of General and Administrative Expenses

General expenses are recognized in the income statement when the corresponding disbursement does not produce future economic benefits, or when such future benefits no longer meet, or cease to meet, the conditions for recognition as assets in the statement of financial position. Expenses are recognized in the accounting periods in which the economic benefits associated with these items are consumed.

n) Seniority Premium and Severance Payment

Current labor regulations require that, upon termination of the employment relationship, regardless of the cause, the employer must recognize a seniority premium in favor of the employee. Additionally, the Company is obligated to compensate employees who are dismissed without justified cause. There is no material staff reduction plan that would necessitate the creation of an additional provision beyond the percentage required by labor regulations for this concept.

Law 44 of August 12, 1995, establishes the obligation for employers to set up a severance fund to pay employees the seniority premium and the severance compensation for unjustified dismissal as established by the Labor Code.

This fund must be constituted based on the portion related to the seniority premium and 5% of the monthly portion of the severance compensation. The Company has established the seniority premium provision based on one week of severance for each year of work, which equals 1.92% of the salaries paid during the year; and the severance reserve is calculated based on 6.54% of the salary, and 5% is calculated on that result.

o) Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or contractual obligation that can be reliably estimated, and it is more likely than not that an outflow of economic resources will be required to settle the obligation, in accordance with IAS 37 "Provisions, Contingent Liabilities and Contingent Assets." The Company establishes provisions for all legal claims where there is a high probability that a disbursement of funds will be required to pay such obligations and a reasonable estimate can be made. When evaluating the probability of loss, the available evidence, the hierarchy of laws, available case law, the most recent court rulings and their relevance within the legal system, as well as the assessment of legal counsel, must be considered.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the specific risks associated with the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

p) Balances and Transactions with Related Parties

Balances and transactions between related parties are all transfers of resources, services, or obligations between related parties, regardless of whether they have been agreed upon under terms and conditions that would have been different if conducted with unrelated parties.

q) Income Tax

Income tax expenses include current and deferred taxes and are accounted for in accordance with IAS 12, "Income Taxes." They are recognized in the income statement except to the extent that they relate to a business combination or items recognized directly in equity or other comprehensive income.

Current income tax is calculated based on the taxable net income for the year, using the tax rate that is in effect at the reporting date of the financial statements; it also considers any adjustments for non-taxable or non-deductible items.

Deferred taxes are recognized for temporary differences between the carrying amounts under International Financial Reporting Standards and the values of assets and liabilities determined according to tax laws. The Company's Management is responsible for ensuring the timely and accurate filing and payment of taxes in accordance with the laws of the Republic of Panama.

r) New International Financial Reporting Standards (IFRS) and Interpretations Not Yet Adopted

New standards, interpretations, and amendments to IFRS have been issued but are not mandatory as of December 31, 2024, and have not been early adopted by the Company.

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(3) Summary of Material Accounting Policies, continued

The main amendment is presented below:

IFRS 18 Presentation and Disclosure in Financial Statements: This standard will replace IAS 1 Presentation of Financial Statements and will be applicable for annual reporting periods beginning on or after January 1, 2027. The new standard introduces the following key requirements:

- Entities will be required to classify all income and expenses into five categories in the statement of profit or loss: operating, investing, financing, discontinued operations, and income taxes. In addition, entities will be required to present a newly defined subtotal for operating profit while maintaining the presentation of net profit.
- Management-defined performance measures (MPMs) must be disclosed in a single note to the financial statements.
- Enhanced guidance is provided on how to aggregate information in the financial statements.

All entities must use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows using the indirect method.

Management is still in the process of evaluating the impact of this new standard on the financial statements.

(4) New Changes Adopted in Accounting Policies

The Company has adopted the Classification of Liabilities as Current or Non-current (Amendments to IAS 1) and Non-current Liabilities with Covenants (Amendments to IAS 1).

The amendments are applied retrospectively. These amendments clarify certain requirements for determining whether a liability should be classified as current or non-current and require new disclosures for non-current loan liabilities that are subject to covenants to be met within 12 months after the reporting period.

Management has applied these amendments for financial statements and disclosures covering the annual period beginning January 1, 2024, without evidencing impacts on the Company's financial statements and disclosures.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(5) Financial Risk Management

The Company is exposed to various types of financial instruments risks. To manage and monitor the different risks to which the Company is exposed, the Board of Directors has established a Risk Committee, which oversees credit, liquidity, market, interest rate, and price risks. An Audit Committee also exists to ensure that appropriate internal controls are established for the presentation of the Company's financial information.

The Company's activities are mainly related to the use of financial instruments, and as such, the statement of financial position is primarily composed of financial instruments, exposing it to the following risks in their use:

- Credit Risk
- Counterparty Risk
- Liquidity Risk
- Market Risk
- Price Risk

A summary of the risks associated with these financial instruments and the Company's policies for managing these risks is detailed as follows:

(a) Credit Risk

Credit risk arises from a client's or counterparty's failure to meet its contractual obligations with the Company when the client or counterparty lacks the financial resources to fulfill their contractual obligations.

Credit risk mitigation is achieved through the establishment of credit policies and the setting of credit limits in each category according to the credit risk profile defined by the Members of the Board of Directors and on the equity condition of the subject to whom the credit limit is granted.

Exposure Limits and Risk Concentration

Credit risk regarding issuers and clients may not exceed 30% of the Company's total equity fund value, and for related parties, the cumulative value of this risk may not exceed 10% of the Company's total equity fund value. Furthermore, the aggregate concentration of risks may not exceed eight times the value of the Company's equity fund. (See Note 22).

Credit Quality Analysis

The Company carries out continuous monitoring and follow-up of its asset and liability positions, both within and outside of Panama. This analysis includes a specific assessment of the exposure in Venezuela, due to the political and economic uncertainty characterizing the country.

The Company maintains constant monitoring of credit risk exposures, generating alerts for the relevant corporate governance bodies. In addition, it uses country risk models based on sovereign ratings from credit rating agencies, allowing it to allocate capital to mitigate exposure to risks in countries outside of Panama.

The following table presents the credit quality of the investments and the allowance for impairment maintained by the Company:

	<u>2024</u>				
At fair value through OCI (Other Comprehensive Income)	12-month ECL (Expected Credit Loss)	Lifetime ECL (not credit- impaired)	Lifetime ECL (credit- impaired)	Purchased credit- impaired (PCI)	Total

Time Deposits Placed in Banks

The Company maintains deposits in banks amounting to B/. 1,546,411 as of December 31, 2024 (2023: B/. 2,113,601). The credit risk on liquid funds is low, as they are mostly deposited in financial institutions with investment-grade ratings. Based on calculations performed by management, the amounts of expected credit loss reserves associated with these financial instruments are not significant.

The following table shows the investment-grade rating of the bank deposits:

(b) Counterparty Risk

This is the risk that a counterparty fails to settle transactions for the purchase or sale of securities or other instruments traded in the securities markets. The risk management policies establish counterparty limits that determine, at any given time, the maximum amount of net exposure to unsettled transactions that the Company may have with a counterparty.

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements**December 31, 2024**

(Stated in Balboas)

(5) Financial Risk Management, continued

The Risk Management Committee is responsible for identifying acceptable counterparties, considering each counterparty's track record regarding the fulfillment of their obligations, as well as indications of their ability and willingness to meet their commitments.

(c) Liquidity Risk

It consists of the risk that the Company may be unable to meet all its obligations due, among other causes, to the loss of value of its investments and other financial assets, an excessive concentration of liabilities from a specific source, or the illiquidity of its assets. The Company manages liquidity risk by maintaining adequate levels of cash, cash equivalents, and financial instruments, allowing it to meet its immediate commitments.

The following table analyzes the Company's financial assets and liabilities grouped according to their remaining maturities based on their contractual maturity dates:

	Current			Non-current		Book Value
	<u>Hasta 1 month</u>	<u>From 1 to 3 months</u>	<u>From 3 months to 1 year</u>	<u>From 1 to 5 years</u>	<u>More than 5 years</u>

(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(5) Financial Risk Management, continued

(d) Market Risk

It is the risk that the value of a financial asset will decrease due to changes in interest rates, exchange rates, stock prices, and other financial variables, as well as the reaction of market participants to political and economic events.

Market Risk Management:

The Company manages its exposure to market risk through weekly assessments of the portfolio's value at risk, limits, and exposures, which are jointly reviewed by the Treasury Committee and the Risk Management Department. In addition, the Company has exposure to international operations, which are subject to the risk of fluctuations in exchange rates. This risk is related to the foreign currency position, which is regularly reviewed as part of the trading portfolio for proper management.

Exposure to market risk:

The company is exposed to this risk due to potential fluctuations in financial markets, which could affect the fair value or future cash flows of financial instruments in its investment portfolios or contingent positions. In a scenario of unfavorable market conditions, this could result in a loss in the value of the financial instruments held by the Company.

To assess the investment portfolio risk, various analyses are performed using the Bloomberg technology tool. This tool enables different risk measurement exercises on the portfolio, such as:

- Allocation: identifies the type of instrument, industry sector, and geographic distribution of investments, helping to identify various types of risks such as sectoral risk and political risk.
- Liquidity profile: measures the portfolio's liquidity horizon across its instruments as a risk metric.
- VAR (Value at Risk): identifies the financial risk of the investment portfolio through the various variables used in its calculation.
- Scenarios: provides a view of Market Risk regarding the sensitivity the portfolio might experience under potential stress scenarios by simulating market behavior based on historical stress situations used as a reference.
- Volatility: offers a perception of the volatility incurred in the portfolio's investments.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(5) Financial Risk Management, continued

To manage risk measurement, the PORT application (Portfolio and Risk Analytics) is also used, where the positions held in a model portfolio are loaded. It is important to note that positions in Venezuelan bonds issued by the Republic of Venezuela or PDVSA are excluded from this analysis.

Other tools and information are also used to manage risk and keep information on the credit quality of portfolio positions up to date, as well as analysts' recommendations. One of these tools is the Interactive Brokers platform, where most of the securities are held in custody. This platform frequently provides credit ratings and analysts' outlooks.

Sensitivity Analysis:

As of December 31, 2024, the market value of the positions used as a reference for the test amounts to approximately \$3,111,762.

The test was conducted using the Global Multi-Asset model under the Global Industry Classification Standard (GICS) sectors, obtaining the following results in the percentage performance of the portfolio's P&L according to each provided scenario, as follows:

- Recovery of the stock market in 2009: +9.32%
- Greek Financial Crisis 2015: -0.74%
- Oil shock due to Libya War 2011: -0.01%
- Russian Financial Crisis 2008: -3.43%
- Oil price drop – May 2010: -0.83%
- Japan Earthquake 2011: -0.13%
- U.S. Debt Ceiling Crisis and Credit Downgrade 2011: -1.74%
- 10% Stock Market Drop: -1.87%
- 10% EUR vs. USD Appreciation: +3.03%
- Lehman Brothers Bankruptcy 2008: -3.77%
- 10% EUR vs. USD Depreciation: -3.03%
- 10% Stock Market Increase: +1.87%

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(5) Financial Risk Management, continued

Description of Stress Test Scenarios:

- Global Equity Market Recovery 2009: Refers to the recovery of global equity markets following the unfortunate events of 2008, which led to a sharp decline in global stock markets.
- Greek Financial Crisis - 2015: Athens' resistance through a referendum and last-minute agreement to accelerate long-resisted economic reforms imposed by creditors in an attempt to remain in the Eurozone.
- Oil Shock due to Libyan War 2011: The civil war in Libya, which began on February 15, 2011, caused a sudden spike in crude oil prices.
- Russian Financial Crisis – 2008: Caused by the war with Georgia, resulting in a sharp drop in oil prices and fears of an economic recession in the region. This crisis spanned from August to November 2008.
- Oil Price Drop in May 2010: Oil prices fell 20% due to uncertainty over how European nations would reduce budget deficits amid an impending economic crisis in Europe.
- Japan Earthquake in March 2011: On March 11, 2011, a 9.0 magnitude earthquake struck off the coast of Japan, triggering a massive tsunami.
- U.S. Debt Ceiling Crisis and Credit Downgrade 2011: A crisis that led to the downgrade of the U.S. credit rating. This stress scenario describes a 17-day period starting July 22, 2011, when markets began reacting to the debt ceiling stalemate, with August 8, 2011, being the first trading day after the downgrade announcement.
- 10% Decline in Equity Markets: A global equity market drop of 10%, affecting U.S., European, Asian, and Japanese markets and triggering a correlation shock.
- 10% Appreciation of the Euro vs. USD: A rise in the Euro relative to the U.S. dollar, with spillover effects on other currencies and equity factors through correlation.
- Lehman Brothers Bankruptcy – 2008: The collapse of the mortgage giant during the period from September to October 2008.
- 10% Depreciation of the Euro vs. USD: A fall in the Euro relative to the U.S. dollar, with spillover effects on other currencies and equity factors through correlation.
- 10% Rise in Equity Markets: A global equity market increase of 10%, affecting U.S., European, Asian, and Japanese markets and triggering a correlation shock.

(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(5) Financial Risk Management, continued

(e) Price Risk

Price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to the individual instrument or its issuer, or by factors affecting all securities traded in the market.

The Company is exposed to price risk from equity or debt instruments classified at fair value through other comprehensive income. To manage the price risk arising from investments in equity or debt instruments, the Company diversifies its portfolio based on established limits.

(6) Impairment of Investments and Other Financial Assets

The preparation of the financial statements in accordance with International Financial Reporting Standards (IFRS) requires Management to make a number of judgments, estimates, and assumptions that affect the application of accounting policies and the reported amounts of certain assets, liabilities, equity, income, and expenses. Actual results may differ from these estimates.

Estimates and assumptions are reviewed periodically and are based on historical experience and other factors, including expectations of future events that are considered reasonable under the circumstances.

(a) Impairment of Investments and Other Financial Assets

The Company determines that investments in securities and other financial assets have suffered impairment when there has been a significant and prolonged decline in the fair value of the investment, due to: an increase in the credit spread, a downgrade in the credit rating since initial recognition, payment defaults, bankruptcy, restructurings, or other similar events that provide evidence of a significant increase in risk.

(b) Fair Value of Financial Instruments

The fair value of financial instruments that are not quoted in active markets is determined using valuation techniques. The models are reviewed prior to use and calibrated to ensure that the simulation results reflect true data and fair values comparable to market values of similar instruments. As far as practicable, only observable data are used as inputs to the model; however, some variables, such as counterparty credit risk, measures of volatility, and correlations, require Management to make certain estimates.

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(7) Cash and Cash Equivalents

Cash and bank deposits are detailed below for purposes of reconciliation with the statement of cash flows:

	<u>2024</u>	<u>2023</u>
Petty cash	200	200
Demand deposits	1,296,211	1,863,401
Time deposits	250,000	250,000
Total cash and bank deposits	<u>1,546,411</u>	<u>2,113,601</u>
Less: deposits with an original maturity Greater than three months	<u>250,000</u>	<u>250,000</u>
Cash and cash equivalents	<u><u>1,296,411</u></u>	<u><u>1,863,601</u></u>

The fixed-term deposit certificates bear a monthly interest rate of 4.60% (2023: 4.90%), maturing on December 16, 2025.

(8) Investment in Securities

The details of investments in securities are as follows:

	<u>2024</u>	<u>2023</u>
Investments securities at amortized cost (AC)	6,839	6,839
Investments securities at FVOCI	2,763,484	1,725,558
Total	<u><u>2,770,323</u></u>	<u><u>1,732,397</u></u>

Investments in Securities at Fair Value through Other Comprehensive Income (FVOCI):

	<u>2024</u>	<u>2023</u>
Foreign shares held as collateral	534,337	795,633
Foreign bonds held as collateral	2,287,169	999,426
Plus: accrued interest receivable	13,490	4,240
Less: allowance for expected credit losses	<u>(71,512)</u>	<u>(73,741)</u>
Total	<u><u>2,763,484</u></u>	<u><u>1,725,558</u></u>

(Panama, Republic of Panama)

Notes to the Financial Statements**December 31, 2024**

(Stated in Balboas)

(8) Investments in Securities, continued

As of December 31, 2024, Management calculated the expected credit losses on securities measured at fair value through other comprehensive income. This portfolio is composed of bonds rated AAA and B+, and therefore their carrying amount corresponds to the market value of the financial instrument. The portfolio also includes shares that are measured at market value and are currently convertible.

During the period ended December 31, 2024, the Company recorded a net unrealized loss of B/.50,258 (net unrealized gain 2023: B/.162,837) resulting from the fair market valuation of the Debt Securities Trading Portfolio – TVD "T" Portfolio, which was recognized under results from financial instruments at fair value in the statement of income.

(9) Repurchase Agreements

The repurchase agreements are detailed as follows:

	<u>2024</u>	<u>2023</u>
United States treasury securities	<u>0</u>	<u>1,732,397</u>

The movement of the repurchase agreement transaction is detailed below for purposes of reconciliation with the statement of cash flows:

	<u>2024</u>	<u>2023</u>
Balance at the beginning of the year	509,000	672,021
Purchases	0	509,000
Sales	<u>(509,000)</u>	<u>(672,021)</u>
Balance at the end of the year	<u>0</u>	<u>509,000</u>

(11) Lease

As of December 31, 2024, the Company maintains a lease agreement for a property primarily used as an office. This lease agreement has a duration of 7 years and, upon expiration, is renegotiated in order to adjust to reflect market conditions.

The movement of the right-of-use asset is presented below:

	<u>2024</u>	<u>2023</u>
Balance at the beginning of the year	308,733	652,514
Adjustments	0	(271,904)
Depreciation for the year	<u>(77,183)</u>	<u>(71,877)</u>
Balance at the end of the year	<u><u>231,550</u></u>	<u><u>308,733</u></u>

The depreciation expense of the right-of-use asset is included under the depreciation and amortization expense line item in the statement of income.

The total amount of cash for leases recognized in the Statement of Cash Flows includes the principal payment portion as a financing activity for B/. 98,357 (2023: B/. 98,357), and the interest payment portion for B/. 19,740 (2023: B/. 24,674).

(12) Other Assets

The details of other assets are presented below:

	<u>2024</u>	<u>2023</u>
Deposits pledged as collateral	51,340	51,840
Accounts receivable from clients	23,758	443,848
Prepaid expense	14,862	13,154
Prepaid taxes	7,952	48,618
Various accounts receivable	<u>602</u>	<u>0</u>
Total	<u><u>98,514</u></u>	<u><u>557,460</u></u>

Courier services	1,292	194
Fuel	1,203	821
Total	<u>156,202</u>	<u>244,079</u>

(19) Income Tax

In accordance with current tax regulations, income tax returns of companies incorporated in the Republic of Panama are subject to review by the tax authorities for up to the last three (3) years, including the year ended December 31, 2024. Additionally, the Company may be subject to examination by the tax authorities to determine compliance with the Tax on the Transfer of Movable Goods and Services (ITBMS) law.

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(19) Income tax, continued

Since 2005, in accordance with Article 16 of Law 6 of February 2005, companies must pay Income Tax at the applicable rate on the greater of the taxable net income calculated using the traditional method and the net income resulting from deducting 95.33% from the total taxable income.

This new basis for calculating Income Tax is known as the "Alternate Calculation of Income Tax" (CAIR). As of 2010, only companies with gross taxable income exceeding one million five hundred thousand balboas (B/.1,500,000) are required to perform this calculation.

Article 91 of Executive Decree No. 98 of September 2010, which amends Article 133-D of Executive Decree No. 170 of October 1993, establishes that taxpayers may request the General Directorate of Revenue to exempt them from applying the Alternate Calculation of Income Tax (CAIR) for determining the tax payable, provided that:

- a) The taxpayer, at the time of performing the Alternate Calculation of Income Tax, determines that it will incur a loss.
- b) If, at the time of performing the Alternate Calculation of Income Tax for determining the Income Tax, it results in an effective Income Tax rate that exceeds the applicable rate.

The reconciliation of the financial profit or loss before income tax is detailed below:

	<u>2024</u>	<u>2023</u>
(Financial) (Loss) Profit before Income Tax	(401,863)	339,932
Foreign income, exempt and non-taxable	(1,093,507)	(3,648,157)
Foreign costs and expenses, exempt and non-deductible	1,421,884	3,315,059
(Taxable Loss) Profit	<u>(73,486)</u>	<u>6,834</u>
Income Tax	<u>0</u>	<u>1,708</u>

The Company has incurred accumulated tax losses which can be applied up to a maximum of 50% of the taxable net income for the next five fiscal periods, at a rate of 20% per year. The portion of the unused tax loss carryforward in any given year may not be deducted in subsequent years and will not generate any refund from the State.

AVANZA CASA DE VALORES, S.A.
(Panama, Republic of Panama)

Notes to the Financial Statements

December 31, 2024

(Stated in Balboas)

(20) Fair Value of Financial Instruments

The Company establishes a fair value hierarchy that classifies into three levels the input data of valuation techniques used to measure fair value:

- Level 1: Quoted prices in active markets for identical assets or liabilities that the Company can access at the measurement date.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. This category includes quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other valuation techniques where significant inputs are observable directly or indirectly in a market.
- Level 3: This category includes all assets or liabilities where valuation techniques use significant unobservable inputs that have a significant impact on fair value measurement. This category includes instruments valued based on quoted prices for similar instruments where significant unobservable assumptions or adjustments reflect differences between instruments.

Other valuation techniques include net present value and discounted cash flow models, comparisons with similar instruments for which observable market prices exist, and other valuation models. The assumptions and inputs used in valuation techniques include risk-free reference rates, credit spreads, and other premises used to estimate discount rates.

The objective of using a valuation technique is to estimate the price at which an orderly transaction to sell the asset or transfer the liability would take place between market participants at the measurement date under current market conditions.

The following table presents the carrying amount and fair value of financial assets and liabilities, including their fair value hierarchy level for financial instruments measured at fair value. This table does not include information on the fair value of financial assets and liabilities not measured at fair value when their carrying amount approximates their fair value.

(20) Fair Value of Financial Instruments, continued

The table below describes the valuation techniques, the inputs used, and the significant unobservable inputs in the fair value measurement of instruments classified as Level 2 and Level 3 as of December 31, 2024 and 2023:

Financial Instruments	Valuation Technique And Input Data Used
Measured at fair value: Debt securities at fair value through other comprehensive income	The fair value is determined using the prices provided by Bloomberg, dynamic spread, and yield to maturity. The fair value of the Level 3 portfolio, Copérnico Fund, is determined by the fund itself and is referenced to the price indicated by the custodian Safra Sarasin Switzerland.
Not measured at fair value: Equity Securities	The valuation technique used is discounted cash flow.
Financing Liabilities	The fair value of financing liabilities for disclosure purposes is based on discounted cash flows using a borrowing rate of 7.94% (2023: 7.58%), which represents the average active interest rate of the Panamanian financial system.

(21) Client Assets Under Management

The Company holds client funds and a portfolio of securities amounting to B/.19,259,984 (2023: B/.27,146,360) under its Brokerage House services, which are deposited with international custodians. These funds have not been recorded in the accounts of the statement of financial position but are instead maintained in off-balance sheet control accounts.

(22) Contingencies

Legal Proceedings

The Company is not involved in any litigation, judicial or extrajudicial claims, pronounced judgments, or ongoing judicial proceedings that need to be disclosed.

(23) Main Applicable Laws and Regulations

The main applicable laws and regulations in the Republic of Panama are detailed below:

General Laws and Regulations

(a) Securities Law in Panama

The securities market in the Republic of Panama is regulated by Decree Law No. 1 of July 8, 1999, which was amended by Law 67 of September 1, 2011. This law establishes the system of coordination and cooperation among financial oversight entities and creates the SMV (Superintendence of the Securities Market).

Agreement No. 4-2011 of June 27, 2011, sets forth rules regarding adequate capital, solvency ratio, capital funds, liquidity ratio, and credit risk concentrations that must be observed by brokerage houses regulated by the Superintendence of the Securities Market of Panama.

AVANZA CASA DE VALORES, S.A.

(Panama, Republic of Panama)

Notes to the Financial Statements**December 31, 2024**

(Stated in Balboas)

(23) Main Applicable Laws and Regulations, continued

Agreement No. 9-2011 extends the effective date of Agreement 4-2011 to July 2012, except for Article 4, regarding the Minimum Total Required Capital under Chapter One on General Provisions, which sets a minimum of two hundred fifty thousand dollars (B/.250,000) effective January 27, 2012, and Article 13 on the Liquidity Ratio of Brokerage Houses under Chapter Six, effective as of January 1, 2012. Additionally, Agreement No. 8-2013, dated September 30, 2013, further extends the effective date of Agreement No. 4-2011 to October 1, 2013. According to Article 4 of Agreement No. 8-2013, the minimum required capital will be B/.350,000, with a six-month adjustment period starting from the publication date of said agreement.

The Company's Compliance Unit is responsible for monitoring compliance with minimum capital requirements. The Company's capital management policies aim to maintain sufficient capital to support the future growth of the business.

The Company acknowledges the need to maintain a balance between shareholder returns and the capital adequacy required by the regulatory authority.

As of December 31, 2024, the Company held eligible assets to meet the liquidity ratio amounting to B/.3,819,504 (2023: B/.3,385,991), which exceed current liabilities of B/.2,235,942 (2023: B/.2,338,927).

The Company maintains a capital fund detailed as follows:

	<u>2024</u>	<u>2023</u>
Regulatory required capital	<u>350,000</u>	<u>350,000</u>
Capital Fund:		
Amount of capital Fund	6,000,000	6,000,000
Right-of-use assets, net	(231,550)	(308,733)
Furniture, equipment, software, and improvements	(42,091)	(47,298)
Fair value reserve	(626,835)	(576,577)

Capital Adequacy

In compliance with Article 24 of Resolution No. 220-07 dated August 8, 2007, regarding the disclosure of capital adequacy standards and their modalities in audited and interim financial statements, we present the following information as of December 31:

	2024		2023	
Solvency Ratio – minimum 8%				
The solvency ratios are:				
Minimum	168.58%	18/11/2024	48.61%	06/01/2023
Maximum	270.99%	23/12/2024	193.49%	24/11/2023
At Closing	260.75%	31/12/2024	176.72%	31/12/2023
Capital funds- Net				
The fund balances are:				
Minimum	1,828,193	13/10/2024	442,616	06/01/2023
Maximum	2,051,997	05/12/2024	1,964,011	15/12/2023
At Closing	1,973,557	31/12/2024	1,899,916	31/12/2023

In addition to the minimum regulatory capital of B/.350,000, the Company must hold 0.04% of the amount of securities held in custody by custodians domiciled in jurisdictions recognized by the Superintendency of the Securities Market, which as of December 31, 2024, represented an additional capital requirement of B/.7,396 (2023: B/.10,088). Additionally, the Company must hold 0.10% of the amount of securities held in custody by custodians domiciled in jurisdictions not recognized by the Superintendency of the Securities Market, which as of December 31, 2024, represented an additional capital requirement of B/.770 (2023: B/.1,926).

The surplus over the minimum regulatory capital as of December 31, 2024, amounted to B/.358,166 (2023: B/.362,014), with which the Company has complied and exceeded.

	2024		2023	
Liquidity Ratio – minimum 10%				
The liquidity ratios are:				
Minimum	153.96%	13/11/2024	86.90%	06/01/2023
Maximum	174.54%	25/12/2024	144.77%	31/12/2023
At Closing	170.82%	31/12/2024	144,77%	31/12/2023

Brokerage houses are required to comply with the capital adequacy standards and their modalities as established by Agreement 4-2011 dated June 27, 2011, issued by the Superintendence of the Securities Market.

Credit Risk Concentration

Risks held by the Company with respect to an issuer, individual client, or a group of related issuers or clients shall be considered a concentration situation when the cumulative value of such risks exceeds ten percent (10%) of the total value of its capital funds. In any case, the value of all risks that a brokerage house contracts and maintains with the same issuer, client, or group of related issuers or clients shall not exceed thirty percent (30%) of the total value of its capital funds. Likewise, the total amount of concentration situations of a brokerage house shall not exceed eight times the value of the Company's capital funds.

As of December 31, 2024, the Company did not report any credit risk concentration with related issuers or clients. The international securities that are part of the investment portfolio measured at amortized cost are 100% provisioned.
